LUX

Jin Kuramoto / Japan

### Outline

In the same concept as the chair (Eight), Jin Kuramoto and CondeHouse developed this round table. The table made of Hokkaido wood obviously looks bold in design. It is composed of the top board of 34 mm in thick and a column-shaped center leg. The tapered leg shape is not only for design purposes but makes more space for the toes. The plain design can go with various chairs, and the top board and leg are available in different finishes, which makes the table more acceptable in public spaces as well.

### Wood coating

You can select two different colors for the table top and leg.

Table, Round Table: Common for Japanese Sen, Japanese Elm and Japanese Oak

### Grain

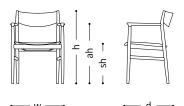

## Random match

Wood planks or veneer sheets are joined at random, of which expressive surface patterns require craftspeople for high skills and an eye for beauty.

## Book match

Two pieces of wood planks or veneer sheets with similar surface patterns are arranged side by side to look like a book opened, which makes surface patterns look more dynamic by grains running symmetrically.
